WELCOME TO 2099

In the year 2099, the climate crisis from decades before has rendered planet Earth uninhabitable. Humanity as we know it was able to survive, but barely. The remaining population has been living on Gaia, the space fleet, for a few decades now. But resources are running out and so is time. A time of crisis. With an intergalactic invasion, political power plays, government overthrow plots, secret training programs and a potential worldwide sabotage, only you can help. After all,

IT'S THE COSMOS AT STAKE
